

TECHNICAL DATA SHEET

Revision: 2

Edition: August/2022

STANLUX SILVER 3201

- High performance aluminium paste with lamellar particles and narrow curve of particles size distribution
- Medium non leafing grade specially recommended for paint formulations that require high metallic effect
- Solvent: mixture of White Spirit and High Aromatic

SPECIFIED CHARACTERISTICS

- | | |
|-----------------------------------|------------|
| • Solid content | 63% to 67% |
| • Maximum retention in # 325 Mesh | 0.10% |
| • Maximum water content | 0,15% |

INFORMATIVE CHARACTERISTICS

- | | |
|---|------------|
| • Average Particles Size- (D50 - Malvern) | 29 microns |
|---|------------|

Typical Uses

- Plastic coatings
- Metal effect coatings with very high surface requirements
- Printing inks with high metallic effect and/or with tinting

Before using the product, we recommend that you consult the safety information, including the adequate handling and transport, which are available in the product's Material Safety Data Sheet – MSDS. The information mentioned in this technical bulletin represents our current level of knowledge and experience, but shall not be considered as a guarantee. It is the user's responsibility to assure the adequate use of the product, since **Aldoro** will not accept liability on any type of loss or damage which may arise due to the use of this information or application of the product. **Aldoro** reserves itself the right of changing, without prior notice, any data contained in this bulletin, resulting from adjustment, development or evolution of the production process.
