

## **TECHNICAL DATA SHEET**

Revision: 6

Edition: August/2022

### **STANLUX SILVER R 2970**

- High performance aluminium paste with lamellar particles
- Coarse non leafing grade specially recommended for paint formulations that require high metallic effect
- Solvent: mixture of White Spirit and High Aromatic

#### ***SPECIFIED CHARACTERISTICS***

- |                                   |            |
|-----------------------------------|------------|
| • Solid content                   | 63% to 67% |
| • Maximum retention in # 325 Mesh | 0.50%      |
| • Maximum water content           | 0,15%      |

#### ***INFORMATIVE CHARACTERISTICS***

- |   |            |
|---|------------|
| • Average Particles Size- (D50 - Malvern) | 32 microns |
|---|------------|

#### ***Typical Uses***

- This product is specially recommended for application in formulations for double layer systems and that require aluminium pigment with high metallic effect.
